

## IMPLANT THERAPY – APPOINTMENT SEQUENCE

### 1. Removal of Tooth/Teeth (if required)

*Cost: Please refer to your estimate of fees*

### 2. Implant Placement

Frequently includes simultaneous tissue augmentation

**Timing:** 10-12 weeks following from tooth removal

*Cost: Please refer to your estimate of fees*

### 3. Post-Operative Review

Review wound healing & remove stitches

**Timing:** 2-3 weeks following from implant placement

*Cost: Included in initial fees*

### 4. Osseointegration Check

Assess implant health and stability

**Timing:** 10-12 weeks following from implant placement

*Cost: Included in initial fees*

5. **Return to your Dentist or Prosthodontist** to begin restorative phase of treatment. Please note, the quote which has been provided by your periodontist does **not** include the restorative phase of treatment. This is separate and will be provided by your dentist/prosthodontist.

### 6. Baseline Review

Clinical measurements and a radiograph will be taken after delivery of restoration to establish a clinical reference point from which to assess the health of the implant over its lifespan.

**Timing:** 1 month after delivery of restoration

*Cost: Included in initial fees*

---

### 7. Continued Implant Assessment

This appointment is to ensure the long-term success of your implant. It's important we monitor the soft tissue (gum) and bone (X-ray) around the implant and to ensure adequate home care is carried out.

**Timing:** 12 months after baseline review

**Cost:** Examination (\$65) and X-Ray (\$40 each)
