

PATIENT INSTRUCTIONS –

Managing Oral Candidiasis (denture stomatitis)

1. Apply **Miconazole (Daktarin)** x 4 times daily prior to bedtime on denture surface in contact with your palate until completion.
2. Remove denture nightly and soak in **Milton's** bleach and water solution (1:10 bleach: water) overnight.
3. Use a separate tooth-brush for brushing your denture. This toothbrush should also be soaked in **Milton's** bleach and water solution (1:10 bleach: water) overnight. This should be in a separate container to your denture.
